

# Did You Know?

- Scotch Whisky is the world's leading international spirit drink, exported to over 200 markets.
- Whisky can only be called Scotch if it is distilled and matured in Scotland. This is defined in UK and EU law, and is accepted internationally, ensuring that when you buy Scotch Whisky you can be sure you are getting the real thing.
- Single Grain Scotch Whisky, a key component of blended whiskies, are Scotch Whiskies in their own right. Their characteristics are as individual as those of each Single Malt Scotch Whisky.
- A pub measure of Scotch Whisky contains only 50 calories – less than a standard glass of wine or half pint of beer.
- The French drink more Scotch Whisky in a month than Cognac in a year.
- The “cup o’ kindness” in the familiar New Year song, Auld Lang Syne, written by Scotland’s Robbie Burns, refers to Scotch Whisky, the spirit of friendship.
- Queen Victoria, responsible in part for creating a demand for Scotch Whisky outside Scotland, used to enjoy a daily dram in her tea.
- Scotch Whisky distilleries play an important role in welcoming visitors to Scotland. Around one million people visit distilleries each year.
- Scotch Whisky is matured over many years – it should be savoured.

**Please enjoy Scotch Whisky responsibly.**

# Distilleries to Visit 2011

From the source of the water to the shape of the still, a distillery tour will help to explain what makes every Scotch Whisky different. No two distilleries are the same. Each has a unique setting and story, as well as a distinctive way of doing things that has evolved over many years.

Visiting a distillery allows you to indulge your passion for Scotch and, at the same time, discover the environment and meet the people that have done so much to shape that instantly recognisable taste.

Many distilleries welcome visits by members of the public. It is often necessary to make arrangements in advance, but many distilleries have extensive visitor facilities and do not require prior warning of a visit.

No matter which distillery you choose to visit – **be it island, mainland, large or small** – you can expect great Scotch Whisky, a warm Scottish welcome, and a fabulous day out.

10am-4pm  
Admission charge £3  
Specialist tastings, ring for information  
Hunters Hike to the water source and peat cutting,  
March-September, book in advance

# Highland

The Highland region is geographically the largest Scotch Whisky producing region. The rugged landscape and changeable climate, and in some cases, coastal locations, are reflected in the character of its whiskies, which embrace wide variations.

As a group, Highland whiskies are rounded, robust and dry in character, with a hint of smokiness/peatiness. Those near the sea carry a salty tang; in the far north the whiskies are more notably heathery and slightly spicy in character; while in the more sheltered east and middle of the region, the whiskies have a more fruity character.

Admission charge for tours £3. Free tasting & viewing of production DVD

# Speyside

**Speyside, a region that borders much of the length of the River Spey on the eastern side of the Highlands, is home to half of Scotland's Scotch Whisky distilleries which are drawn together around a system of rivers.**

The whiskies of this region are noted for their elegance and complexity. The flow of water over hills of granite and through moors of peat, add a refined smokiness to many of the malt whiskies and the slightly more sheltered nature of the terrain imparts a specific gentleness and delicacy to their character.

# Lowland

The Lowland whiskies are produced in the south of Scotland, identified on the map as the area south of an imaginary line between Dundee and Greenock.

Lowland whiskies reflect the calm, lush countryside of the region and tend to be light, soft and mellow and gentle on the palate.

## Auchentoshan Distillery

 map ref: 4
